

FINE PAPER ARTWORK REQUIREMENTS

INSTRUCTION

When you are using Fine Papers for your letterhead printing, please use the digital offset templates, and do follow the guidelines in the respective letterhead templates while designing. Due to some production limitations, we cannot print in full bleed on the left and right side of the letterheads. This is for **Fine Paper** options only.

Note: Due to some limitations, there will be a non-printable area of 5mm on both side of the artwork. Images that are in the bleed area will not be printed out in the final outcome.
