

POSSIBLE ISSUES ON SPOT UV ARTWORK

You are advised to read and follow the guidelines in Artwork Preparation for Spot UV.

Possible Issues

Below are some illustrations of some possible Artwork Setting issues. Spot UV element is to be outlined in Yellow for your reference.

Desired Print Outcome

Possible outcome

It might not be clear for line thickness of lesser than 0.5pts.

Text or Font size lesser than 4pts may also unclear or printed as a block as per illustrated above.

It may be printed as a block if words are too small, or it might not even be printed in some situations.

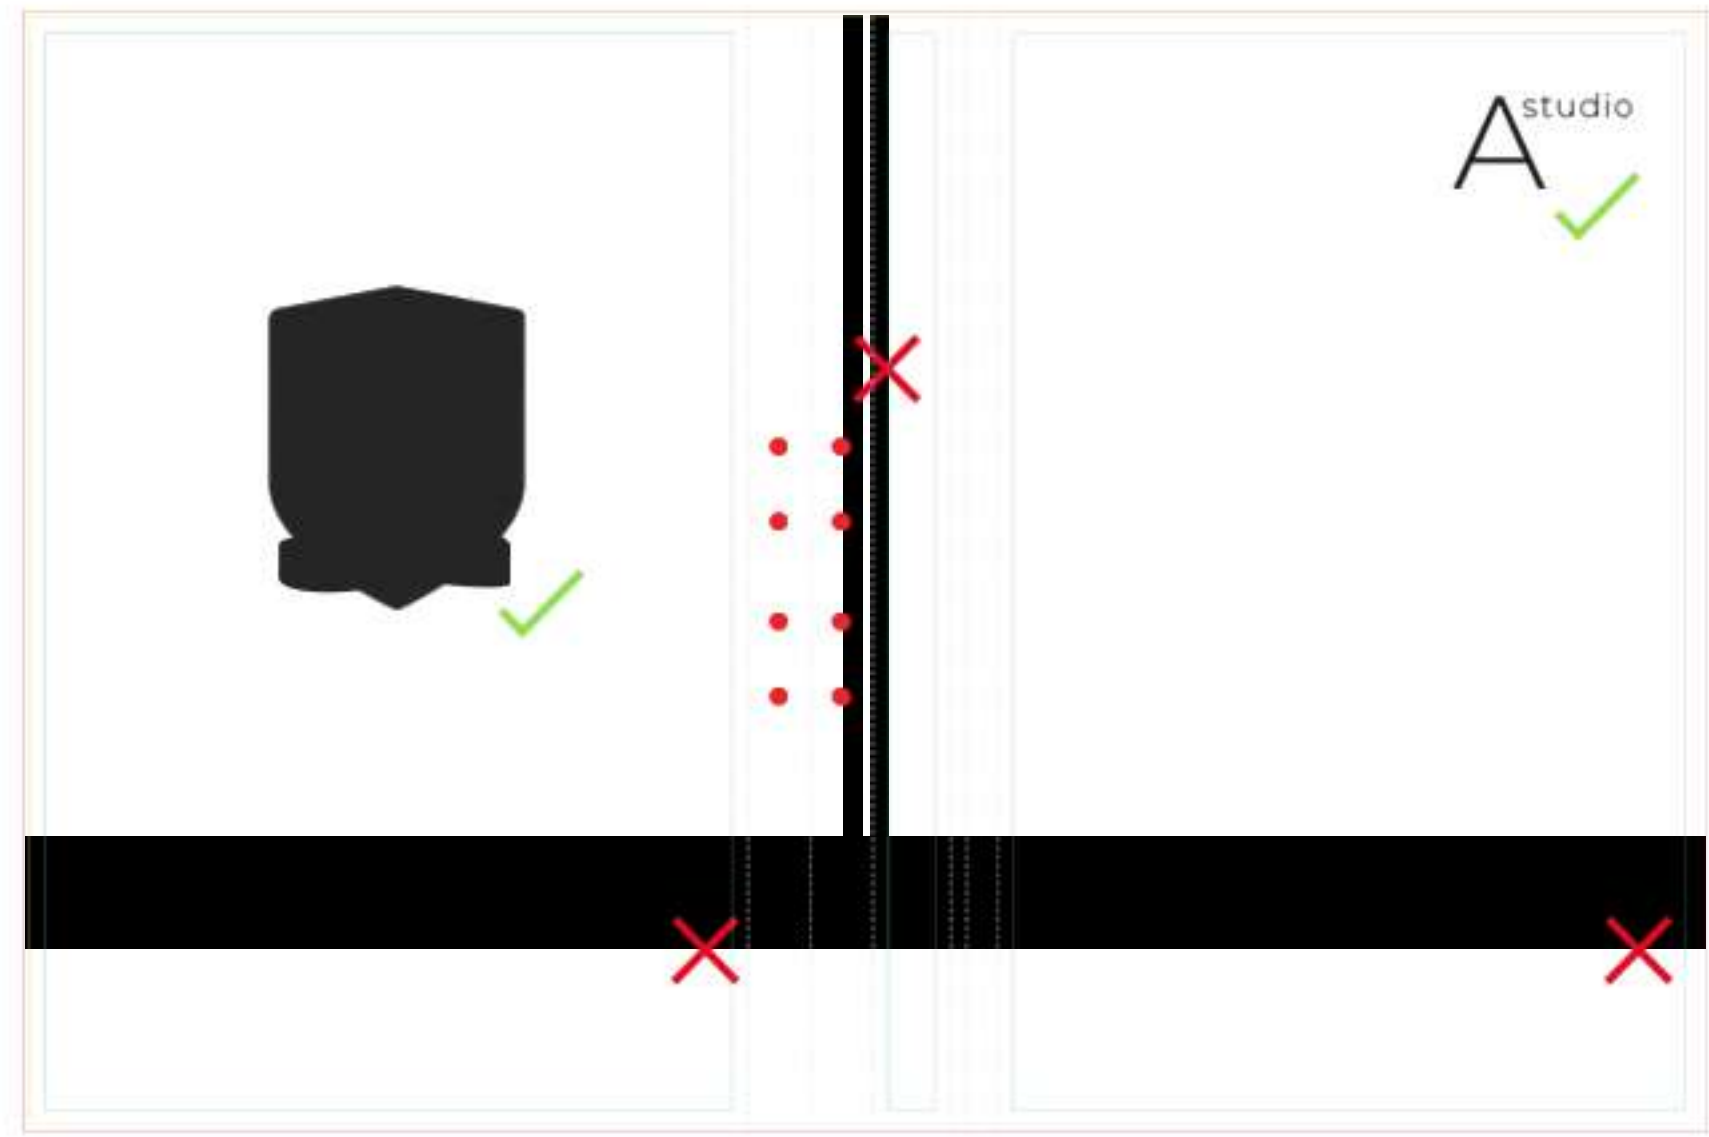

Shall there be any mis-registrations, it may be more obvious if there are outlines of Spot UV applied.

Spot UV coating may be able to be peeled off along the trim edge. Hence, we don't recommend to put it too near the trim zone.

Same goes to hole punching edge, its may be peeled off easily.

Avoid applying Spot UV on hole punched areas
Avoid applying Spot UV on creasing lines
Avoid applying Spot UV on gluing zones
Avod Spot UV in the gluing area and creasing lines. It may be peeled off.
