

SPOT COLOUR ARTWORK PREPARATION GUIDE

Printing Outcome

1 Spot Colour
(Standard Colours)

If you wish to print such artwork, you will just need to indicate the actual colour of your artwork by keeping a remark together with your submission of order and artwork.

In example, Magenta.

Preparation Guide

Prepare the artwork by filling the whole artwork in black to represent the actual artwork colour.

In this situation, you are recommended to submit one actual artwork of your desired printing colour, and one artwork prepared seperately.

Printing Outcome

2 Spot Colours
(Standard Colours)

If you wish to print such artwork, you will just need to indicate the actual colour of your artwork by keeping a remark together with your submission of order and artwork.

In Example, Magenta and Cyan

Preparation Guide

Prepare the artwork by representing Black as Magenta, and Magenta as Cyan.

In this situation, you are recommended to submit one actual artwork of your desired printing colour, and one artwork prepared seperately.

Note: By doing so, it will help to prevent our pre-press department's error in applying your print as CMYK colour mode, and we will have a clear idea on what outcome you are expecting on your prints.
