

USING OUR TEMPLATES

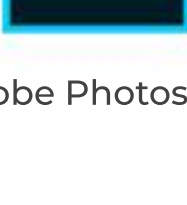

WHY YOU SHOULD USE OUR TEMPLATES?

The templates that you have downloaded are blank and has no design in it. The purpose is to provide you with a predefined guide lines showing you where are the bleeds, safe zones, and trimming lines. By following our guideline, you may have better understand in the specification we require on the proper artwork preparation process. By doing so, we can save a lot of time in checking and amending the criteria not met. We can be faster in getting your job done!

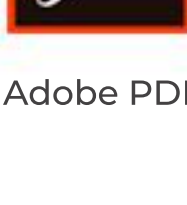

You can download our product templates in 3 available format:

Adobe Illustrator

Adobe Photoshop

Adobe PDF

IMPORTANT GUIDELINES

Full Bleed (Artwork size that you should prepare)

- a) Full bleed shall make an extension to your background design.
- b) When preparing your artwork, expand your background images on each sides to the edge of the template.
- c) If the artwork not in the full bleed, you might get a line on the edge of your printed job.

If the full bleed isnt filled, you might get a line on the edge of the prints. Refer to illustration below.

Bleed Size

Trim Size

Safe Zone

↓

Trim Size (Product Size that you will receive)

- a) This is the finished size of your products.
- b) We will trim anything beyond this area. Do not keep any words or images near the area.
- c) We don't recommend in adding a border to your print, as it may result in uneven edge measurement of the border, due to the trimming and production process.

If you keep your elements beyond the trim zone, you might get them cut as per illustration

Bleed Size

Trim Size

Safe Zone

Safe Zone (The area which you should keep your important messages)

- a) Any images, logo, text, words, and lines, are required to be kept in this zone.
- b) This is to prevent any cutting risk or error to your print jobs.

To keep your print as proportionate as possible, we highly advise you to use our templates as per instructions and guidelines here. Refer to illustration for the correct artwork preparation.
